

PUBLIC FOLDER MIGRATOR

ENTERPRISE FEATURES

Migrate public folders of any size or complexity from Exchange on-premise to Microsoft 365 Exchange Online. Full sync capabilities mean that every folder, item, mail-enabled property, or configuration is synced from source to destination with complete chain of custody tracking. A completely seamless migration process that takes the traditional complexity out of public folder migrations.

"This was a nervous migration for me, something I was putting off for a while. With ExchangeSavvy's tools and help it was a breeze and I now wish I had done this months ago. I would absolutely, without hesitation, recommend ExchangeSavvy to others!"

Michael
IT Manager at PDD Group Ltd

SEAMLESS END USER EXPERIENCE

Migrator fully replicates the source public folders with full incremental support, giving end users exactly the same experience they had prior to the cutover.

AUTOMATIC PUBLIC FOLDER SIZING

Take the guesswork out of the equation! Makes any public folder hierarchy compatible with Exchange Online limits using our US-patented sizing algorithm.

CUTOVER MAIL-ENABLED PUBLIC FOLDERS

Whether you have 10 or 50,000 or more mail-enabled public folders, migrate all mail properties to Exchange Online to maintain mail flow post-cutover

MIGRATION WIZARD

Four-step process guides you through the entire migration process. Finalize/Cutover tasks allow full customization of the migration experience with full rollback support giving you peace of mind.

MODERN AUTHENTICATION SUPPORT

Uses the latest modern authentication methods for connecting to Exchange Online.
